Review Process

ACWWA's Development Review Consultant, Merrick, will review the submitted documents for compliance with ACWWA Rules and Regulations, and ACWWA Engineering Standards. Review comments will be returned within 10 business days requesting the applicant to revise and resubmit, or if everything is found to be in compliance, to submit final submittal documents. If revisions/modifications or additional information is requested that will be identified in a letter format and redlines from ACWWA to the applicant. The applicant will need to gather the information needed or revise the appropriate documents accordingly and resubmit those documents requested. Once all documents are found to be in compliance by ACWWA, a final approval letter will be issued requesting final documents be submitted.
